

The presentation will focus on major U.S export requirements in high tech businesses. Emphasis will be on aerospace business, and on U.S. governmental regulations as stipulated by the ITAR (Department of State) and the EAR (Department of Commerce). The theme will be that this is a growing concern for security organizations in many high tech companies which deal internationally. The foundation is that United Space Alliance began facing this challenge 10 years ago, and has learned many lessons from the adventure.
