

**Bio:** AARON HUGHES is the CEO of IAC SecureTech in Houston. He and his team currently provide real time analysis of over 80 million regulatory compliance, intrusive and corporate misuse related events per month on behalf of their clients. In addition, Aaron has provided litigation support on corporate and white collar crimes, theft of intellectual property, and corporate misuse cases. Aaron is an active CISSP (Certified Information Systems Security Professional), a member of ACFE (the Association of Certified Fraud Examiners), has worked with the NIST and URAC in developing healthcare information security standards for nationwide use, and has trained many attorneys and firms in looking "beyond the hard drive" to build case strategy.
