

## **Biography for Eddy Russell, Owner of Sunset Glass Tinting**

**Sunset Glass Tinting** is celebrating **20 years in the commercial & residential glass tinting business** and 25,000 local installations. We invite inquiries to the Better Business Bureau regarding our impeccable service and perfect record. Reliable products and good reputation were instrumental to Sunset Glass Tinting being included in the Houston 100 in 1995. The Houston 100 is a prestigious group of the fastest growing, privately held companies in Houston. Houston area owned and operated, **Sunset Glass Tinting** is dedicated to helping our residential and commercial customers make their homes and businesses more comfortable, beautiful, energy efficient, and secure, while protecting their interiors from the harmful effects of ultraviolet light.

Eddy is a local boy from Simonton, TX and graduated in 1979 from Stephen F. Austin University majoring in Business. He is a member of the 3M Window Film Advisory Board and participates in several local and international groups involved with the installation of sun control and security window film related industries. He has completed projects in Houston like the Exxon building, the Astrodome, former president Bush's home.

**3M** Scotchshield Ultra Safety and Security Window Film helps hold your glass in place during hurricanes, tornadoes, severe winds, earthquakes, even bomb blasts and other explosions. It helps maintain the integrity of a building's outer shell to keep wind, rain and flying glass shards from wreaking havoc inside the buildings. Scotchshield window film also helps deter smash-and-grab burglars by eliminating their most crucial weapon . . . time. Bright, sunny days pose threats, too, because UV rays cause interior fading. All Scotchshield clear or tinted films substantially reduce fading of your carpets, upholstery, furnishings, and merchandise by blocking out up to 99% of the sun's damaging UV rays.
