

Comprised of a nationally recognized academic medical center and four community hospitals, The Methodist Hospital System is currently ranked in the U.S. News & World Report's "America's Best Hospitals" list and is one of FORTUNES's "100 Best Companies to Work For" – an accolade achieved annually since 2006. Make your first day exceptional...at Methodist

Sr. Security Systems Specialist

JOB SUMMARY

Researches, designs and implements facility wide building security access control and video solutions that enhance and support TMH operational and business performance. Determines operational and business requirements and needs for developing solutions and optimizing performance of existing and new building security systems. Designs or customizes software and systems for optimizing operational efficiency and improving business processes. Supports all users of application systems, timely implementation of ongoing maintenance of applications, and provides the opportunity for enhanced user productivity.

EDUCATION REQUIREMENTS

Bachelors degree and a minimum of three experience OR ten years of relevant experience required.

EXPERIENCE REQUIREMENTS

A minimum of five years experience in programming, installing and maintaining access control, intrusion detection, and security video systems is required. An advanced certification in low voltage electronics and security systems is preferred.

SPECIAL KNOWLEDGE, SKILLS AND ABILITIES REQUIRED

Knowledge of various hardware and software including windows operating system, windows networking, knowledge of Microsoft SQL database, Microsoft server, Microsoft workstation and TCP/IP networks.

A high level of analytical ability is required in order to interpret and resolve complex technical issues, sometimes requiring original solutions in circumstances where the work product or service affects the design and operation of critical systems.
